

## Wound Care Instructions:

1. For the first 24 hours, do **NOT** takeoff the bandage and get it wet.
2. After the first 24 hours, cleanse the wound with soap and water OR hydrogen peroxide, using either a cotton-tipped applicator or gauze.
3. Apply a thin layer of Aquaphor/Neosporin/Bacitracin/Vaseline to the wound.
4. In the event, any post, excessive, redness, tennis, or swelling occurs, please call the office and make an appointment to come in for a visit.
